EXPERIENCE

Finrax | Sofia, Bulgaria (Remote) OCT 2025 - PRESENT
Frontend Engineer (full-time)

- Build the checkout, merchant dashboard and back office of a crypto payment gateway processing **$240M+ in monthly payment volume** and **1.2M+ transactions** across **170+ countries**.
- Accelerated the merchant dashboard rewrite and migrate the Vue 2 back office to **Vue 3** via **single-spa microfrontends**.

EDITED | Sofia, Bulgaria (Remote)
Frontend Engineer (full-time) JUN 2025 - OCT 2025

- Built high-performance features powering analysis of **5B+** SKUs across 5,000+ retailers in 110 countries on EDITED's AI-powered retail intelligence platform.
- Took ownership of the platform's business-critical Filter system used daily by merchandisers at **PUMA**, **PVH** (Calvin Klein/Tommy Hilfiger), **MANGO**, and **Harrods** to segment **billions** of SKUs.

E.ON Digital Technology | Hannover, Germany (Remote)
Frontend Engineer (contractor) DEC 2023 - JUN 2025

*E.ON's tech subsidiary - one of Europe's largest energy companies, serving ~**47M customers***

- Developed E.ON Home web and mobile apps (**100K+ downloads**) for Home Energy Management Systems (HEMS), enabling real-time control of EV charging, solar panels, and energy usage.
- Migrated E.ON's admin portal from **Angular to React**, improving performance and responsiveness for managing critical data.

Three11 | Varna, Bulgaria (Remote)
Frontend Engineer (full-time) JUL 2023 - JUN 2025

- Shipped frontend features across **multiple client products in parallel** - SaaS platforms, e-commerce, and embedded/desktop tooling - switching stacks (React, Vue, TypeScript) and domains per engagement.

Kinetik Automotive | Varna, Bulgaria (Remote)
Frontend Engineer (contractor, via Three11) JUL 2023 - SEP 2024

- Built real-time telemetry dashboards for the Kinetik E-Series - **Eastern Europe's first all-electric go-kart championship** (40 kW karts, 0–100 km/h in 3.5s) - delivering the full redesign **2x faster** than the required timeframe.
- Built React dashboards for electric sport bikes and cars, packaged with **Electron** and running in-vehicle on **Raspberry Pi**.

Dev-Harbour | Sofia, Bulgaria (Remote)
Junior Frontend Developer (full-time) NOV 2022 - JUL 2023

- Developed a back-office app for managing internal workflows and contributed to an internal AI tool automating e-commerce operations - early **LLM-API** adoption (2022–23)
